*** Notes of Significance ***

South Fork Zone consists of 3 fires on the Caribou-Targhee National Forest Black, Carrot, and Big Elk.

Evening Brief

Date/Time Stamp: **Thursday, August 25, 2016 - 10:44 PM**

Weather Summary

Deeper moisture will remain in place through Friday with higher RH and **wetter thunderstorms** across Utah (with the exception of Northwest Utah) and at times into far eastern/southern Nevada.

Gradual warming and drying from west to east expected to begin Saturday with most areas seeing dry weather through Tuesday. Winds will shift to the west again by Friday across Nevada/Idaho and increase this weekend and especially next week.

Forecast models do indicate the potential for increasing southwest winds over Nevada and into Idaho by early to mid-next week with a possible return of dry lightning to Idaho by the middle of next week. There is a lot of uncertainty, however this will continue to be monitored.

Preparedness Levels

Current:

Great Basin	4
National	4

Great Basin Fire Activity: Light Initial Attack

New Fires and Acres: 11 fires for 490 acres / 2874 acres Large Fire Growth

Great Basin Fire Potential Summary

ERC's have rapidly risen to near or beyond the 97th percentile across a large portion of Idaho. With ongoing fires in Idaho and western Wyoming there is the potential for significant growth.

Elsewhere nearly as dry across western Wyoming, northern Nevada and northern Utah with most ERC's in the 90th-97th percentiles. Western Nevada had significant lightning activity the past 48 hrs. and there is the potential for holdovers with westerly breezes of 15-25 mph and single digit afternoon humidity.

Moist conditions are expected to continue across southern portions of Utah and Nevada.

A Fuel and Fire Behavior Advisory is also in effect for the Northern half of Nevada, Southern Idaho and Northwest Utah.
